

NOTES
 This Restoration Masterplan is for illustrative purposes only. Site levels, services, infrastructure and all dimension and landform levels to be verified on site. Extraction area illustrated as general development area and final depths and extent of working should be confirmed through the operational development details. Details for planting, seeding and aftercare are to be submitted as a separate item. This will also involve submission of phasing scheme whereby the CLEUD area is prepared at a similar time as the formation of the new access road. Following relocation of all operations associated with the CLEUD, the former area will be restored to grassland with Branton Hill Lane being closed to HGV traffic other than direct field access for agricultural purposes.

Key	
	Branton Hill Quarry boundary, incorporating ultimate final landuses
	Area of open water or marginal wetland habitat also serving as a surface water soakaway
	Proposed field hedgerows comprising native species
	Indicative areas of existing woodland / vegetation outside the site
	New site access subject to separate planning consent
	Footpaths replaced along definitive route or other similar location
	Existing hedgerows with additional gapping up and new boundary fencing as necessary
	Exposed sandstone faces retained as part of overall restoration scheme
	Existing contours beyond area of cut/fill including OS contour data beyond site boundary
	Alignment of overhead electricity lines
	Proposed mixed species deciduous woodland with areas of open glades and shrub edge mix
	Alignment of stock fencing around pasture fields (external areas will be allowed to regenerate and develop rough grassland community)
	Proposed restoration contours
	Existing/proposed track or hardstanding
	Areas restored to grazing pasture or cut for hay/silage
	Areas of grassland in peripheral areas, likely to be self regenerated and remain as rough grass areas for habitat diversity
	Proposed contours for the Clead Consolidation Area, and adjacent embankment for landscape screening
	Existing woodland within the site (trees shown are approximate based on existing areas)

Client: **Bliss Sand and Gravel Company Ltd.**

Project: **Branton Hill Quarry Restoration Design Relating to Revised Access Route**

Title: **Restoration Masterplan**

CAD Ref: BH911-D3v2	Version: 2	Drawn by: RB	Plot size: A1 oversize	Date: January 2012
Restoration layout is indicative only. All site details to be measured, underground services checked and layout adjusted accordingly prior to implementation. Levels in metres above Ordnance Datum. All dimensions to be checked on site.
